Sowing Hope: My Farming Journey – Ruksana Syed

I'm Ruksana Syed from Phulshivara village. Farming was once full of struggles—unpredictable weather, rising costs, and limited resources made it hard to sustain. But things changed when I joined the agro-forestry program initiated by Cosmo Foundation and Prayas Youth Foundation.

With their support, I planted 250 sweet lemon trees and started intercropping with tur, which improved both my earning and soil health.

Today, my orchard is healthy and thriving—new leaves have sprouted, and small fruits are forming. Thankfully, there are no pests or diseases so far. This experience has shown me that with the right guidance, farming can be sustainable and secure. I'm truly grateful to the teams who helped turn my land—and my future—green again.

My Journey of Growth with Cosmo Foundation

“

Working as a computer teacher with Cosmo Foundation at Nutan Kanya Vidyalaya, Waluj, has been a turning point in my life. I started with the simple aim of teaching computers, but soon realized that I was learning just as much as I was teaching. Seeing students who once didn't know how to switch on a computer—now confidently create presentations and help their parents with digital tasks fills me with pride. Their progress inspires me every day. This experience has helped me become more confident, patient, and responsible, both as a teacher and as a person.

I am truly grateful to Cosmo Foundation for giving me this opportunity. Being part of this mission to empower rural children with digital education makes me feel proud and purposeful. It's not just a job—it's a journey of transformation, for them and me.
